

## Home Tap Water Pre-filter (General Flushing)

New Filtration Technology

### Introduction

The central water Pre-filter is mainly used to 'capture' the particulate impurities, sediment, rust, floating particles, and other big size pollutants in the water. It is like a 'primary wall' to protect your house appliances and plays a positive role in protecting & extending the terminal water production equipment service lifetime, such as downstream pipes, water purifiers, water heaters, wall-mounted furnaces, washing machines, bathroom showers and so on. The prefilter is flushable and reusable.

NFT-FM-MK001 series is standard Manual Flushing, easy to be installed and indicates when the mesh filter needs cleaning through water flow rate and filtration efficiency. Due to different water quality, the recommended clean time not stable, but up to date in 7-30 days.

### Features

- Visual housing, easy install, and maintenance
- Flushing in anytime controlled by yourself which makes all components in clean condition
- No extra power required
- Long service lifetime and protection function
- Explosion-proof filter housing, temperature resistance up to -30°C
- Upgraded PA Material Housing and Food Grade Stainless Steel mesh
- Horizontal and multiple direction connection ports are available, suitable for different house pipe condition

### Technical Parameters

Flushing Prefilter	Item #	Flow Rate T/H	Applicable Feed Water	Applicable Pressure MPa	Temperature °C	Fittings/Inlet & Outlet size Inch	Micron Rating um	Dimension mm
	NFT FM-MK001	3	Municipal Tap Water	0.1~0.5	5-40	3/4" 1/2"	40	/
